DETAILED ACTION

Claim Objections

1. Claim 44 is objected to because of the following informalities: "comprising" in line 2 should be changed to --including--; "structure" in line 2 should be changed to --a structure--. Appropriate correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 25-44 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2 of U.S. Patent No. 6,767,117. Although the conflicting claims are not identical, they are not patentably distinct from each other because all limitations of claims 25, 31, 33, 39, 43 and 44 have been disclosed in claim 1 and 2 of U.S. Patent No. 6,767,117.

Application Claims	Patent 6,767,117 Claims	Remarks
25 and 31	1	Identical
33 and 39	2	Identical
43 and 44	1 or 2	Identical

Claims 26—30, 32 and 41 are necessary included because they are dependent on claim 25.

Claims 34-38, 40 and 42 are necessary included because they are dependent on claim 33.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 44 is rejected under 35 U.S.C. 102(b) as being anticipated by D.J. Biller [US 2,446,736].

Regarding claim 44, D.J. Biller discloses a lighting fixture having an upper support [A, 9] attached to a structure [C], a lamp housing [B] with an electric receptacle and an electric light source, a rear support arm [others A, 9] attached to the structure [C] with a distal end attached to the lamp housing [B] higher than the electric receptacle, and electric wiring [2] running from the structure [C] along the rear support arm [others

A, 9] into the interior of the lamp housing [B]. In which, a portion of an electric light source positioned in the receptacle is lower than a portion of the electric wiring [2] (figures 1 and 2).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. J.P. Hebendahl [US 1,767,585] discloses a lighting fixture.
